

AMENDMENTS TO THE SPECIFICATION

The Specification is amended by way of Substitute Specification. A marked-up version of the specification is included in attached **Appendix A**. A clean version of the amended specification is included in attached **Appendix B**.

AMENDMENTS TO THE ABSTRACT

Please amend the abstract as follows:

A multi-fold door or window panel leaf joinery assembly has a joinery-bogey-unit door or window carriage that is pivotally connected to a joinery leaf door or window panel. A seal is provided on a moveable edge of the leaf panel adjacent to the bogey-unit carriage, the seal being adjacent to a frame seal for a head or sill of a frame of the assembly when the at least one leaf panel is in a closed position. The pivot connection is off-set so that the seal moves away from the frame seal when the leaf panel is opened, thus avoiding seal wear through scrubbing.
